

Absence management tailored for growing financial businesses

Mental health is one of the fastest growing reasons for absence in the UK, increasing by 71.9% since 2011, but no industry has been affected more than finance. The financial sector suffers from extremely high levels of poor mental health, with 34% of all absences in this industry being attributed to mental illness.

We understand that for financial businesses to grow and prosper, employees need to know that their employers are there to support them. Our absence management platform removes mundane manual processes and provides the most innovative and unique solutions to enhance employee wellbeing, helping employees feel their best.

Our solution

Greater insights into employee wellbeing

Track and monitor sick leave across your whole organisation. Managers can report on exact sickness types, enabling them to better understand the reasons behind short-term and long term absence.

Offer expert medical advice

Employees can receive expert medical advice from the NHS through the e-days platform, allowing employees to quickly get the help they need to address medical ailments.

Take the stress away from booking holiday

Stop logging holiday through spreadsheets and enable employees to book holiday in seconds. Managers have clear visibility of who is in and out of the office through the e-days platform, and can quickly approve holiday. They can even identify employees that haven't taken holiday in a while and push them to take a well deserved break.

Why we're reaching out to you...

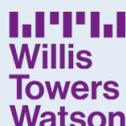

We've worked with several financial businesses that were previously wasting time and money on manual absence tracking methods to create streamlined processes, designed with their employees in mind.
